

+9

Ecco un consiglio: invece di aggiungere direttamente 9, prova ad **aggiungere una decina e a togliere un'unità!**

$36 + 9 = 36 + 10 - 1 = \underline{\hspace{2cm}}$

$33 + 9 = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$25 + 9 = 25 + 10 - 1 = \underline{\hspace{2cm}}$

$52 + 9 = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$12 + 9 = 12 + 10 - 1 = \underline{\hspace{2cm}}$

$38 + 9 = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$27 + 9 = 27 + 10 - 1 = \underline{\hspace{2cm}}$

$41 + 9 = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$42 + 9 = 42 + 10 - 1 = \underline{\hspace{2cm}}$

$8 + 9 = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$17 + 9 = 17 + 10 - 1 = \underline{\hspace{2cm}}$

$46 + 9 = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$34 + 9 = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$35 + 9 = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$45 + 9 = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$19 + 9 = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

+19

In questo caso, anziché fare +19, prova ad **aggiungere due decine e a togliere un'unità!**

$36 + 19 = 36 + 20 - 1 = \underline{\hspace{2cm}}$

$13 + 19 = \underline{\hspace{2cm}}$

$24 + 19 = 24 + 20 - 1 = \underline{\hspace{2cm}}$

$42 + 19 = \underline{\hspace{2cm}}$

$32 + 19 = 32 + 20 - 1 = \underline{\hspace{2cm}}$

$28 + 19 = \underline{\hspace{2cm}}$

$27 + 19 = 27 + 20 - 1 = \underline{\hspace{2cm}}$

$21 + 19 = \underline{\hspace{2cm}}$

$33 + 19 = 33 + 20 - 1 = \underline{\hspace{2cm}}$

$19 + 19 = \underline{\hspace{2cm}}$
